# Assessment Workshop

Top companies have recognized the evolution of the procurement function from a cost center to a strategic operation that can enable lower total cost of ownership (TCO) on goods and services while delivering more productive, efficient operations. This transition requires a more integrated and collaborative approach that focuses on improving processes and cooperation between partners.

Starting back in Release 11.5.10, the Oracle e-Business Suite recognized this transformation with enhanced Advanced Procurement Services offerings. **O2Works** consultants, with years of experience with the Oracle apps as well as strong procurement and business knowledge, can lead an organization through a focused workshop to assess the procurement value chain. The goal of this appraisal is to evaluate current processes and alert companies to new features and functionality that could provide them with new competitive advantages. Our experienced consultants will show how to get the most out of the E-Bus applications.

**Description of Service:** Depending upon the complexity of the Procurement Value chain, **O2Works** will deploy a team consisting of one or two Procurement Experts. We will conduct interviews over a 2 –3 day timeframe and identify areas where improvements can be made and new features & functionality could enhance current processes. It is expected that the evaluation will be completed within one week's time and findings and recommendations delivered the following week.

**Deliverables:** Engagement deliverables for the Oracle Advanced Procurement Services Assessment:

☑ A report detailing our findings covering:
- Recommendations on new features / functionality to consider
- Description of the affected process and modification
- Effort level of remediation (low, medium, high)
- Best practices approach to improvements
- Classification of benefit

☑ Strategic briefing meeting / presentation for key personnel and end-users

Our goal is to help you enhance your Procurement Value Chain capabilities through more effective use of your updated Oracle Procurement Financial application and get the most out of your Oracle E-Business Suite investment.
